
inside b: a contact
outside: none
geometry a: vertices p and an inner sphere
ρ
$n = R_b\,\nabla\phi_b / \|\nabla\phi_b\|$
$\phi_b = +0.5$
$\phi_b = 0$
$\phi_b = -0.5$
$|d|$
p: gap $d = \phi_b(T_{ba}\,p) < 0$,
a contact; the force on a acts along $+n$
geometry b: its SDF ϕ_b
